Notes

Each sticker appears once, cropped from the sharpest photo it was visible in. Where the same sticker is on the wall more than once (O.S., EMAX, JetT, TBS crossbones) that is noted under its name.
Several stickers overlap on the wall, so a few crops include the edge of a neighbour.
Names come from the printed text; artwork-only stickers have short descriptive names.
The small grey tag on each card (e.g. “Photo 10”) is the source photo, in upload order.
